

LAPORAN PRAKTIKUM Pemrograman Berbasis Web

PBW B

Untuk memenuhi Tugas Praktikum PBW B

Oleh :

Nama : Hafiyah Sayidan

NPM : 4521210074

Dosen :

ADI WAHYU PRIBADI, S.Si., M.Kom

S1-Teknik Informatika

Fakultas Teknik Universitas Pancasila

2023/2024

➤ Tujuan Praktikum

1. Membuat sistem pendaftaran pengguna dengan PHP 8 dan MySQL Server.
2. Membuat halaman login dan dashboard untuk admin dan pengguna.
3. Menerapkan tampilan yang rapih menggunakan HTML dan CSS.

➤ Alat dan bahan

- Sublime Text
- Laragon

➤ Skenario

Terdapat dua aktor: super user dan user

use case super user: login, lihat dashboard, membuat user, melihat daftar user, edit dan hapus user.

use case user: registrasi, login, masuk ke dashboard, membuat profile, melihat profilnya.

Berdasarkan skenario di atas, maka kita membuat dua tabel yaitu

table user dan table mahasiswa yang relasinya adalah one-to-one.

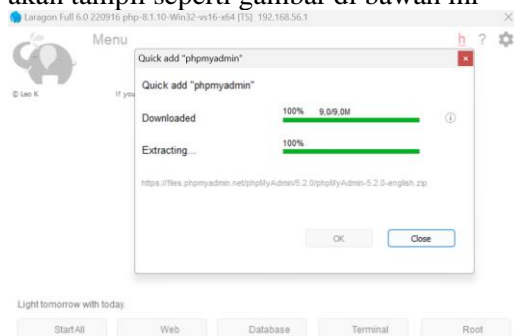

table user --> id, username, email, password

table mahasiswa --> id, id_user, nama, alamat, fakultas, tahun_masuk

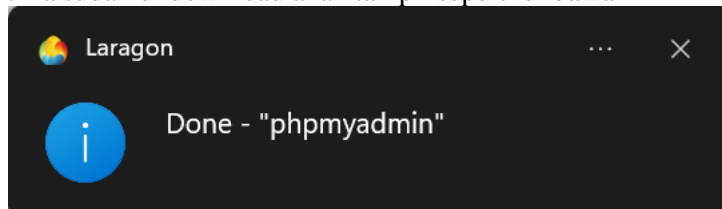

LANGKAH 1

Install phpMyAdmin

- Buka halaman <https://pemburukode.com/cara-memanggil-phpmyadmin-di-laragon/>
- Atau bisa klik kanan di laragon dan klik tools dan lalu klik phpMyAdmin dan mendownload akan tampil seperti gambar di bawah ini

- Jika sudah di download akan tampil seperti di bawah ini

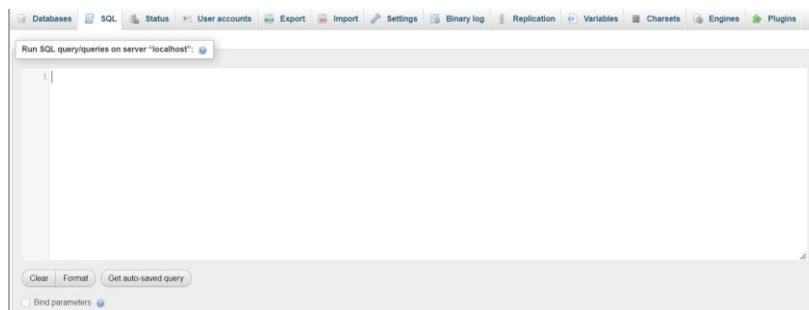

- Tampilan awal nya akan menjadi seperti di bawah ini isi username dengan root dan password di biarkan kosong aja

LANGKA 2

Buka database dan table , lalu klik mysql

- Setelah itu masukan perintah sql di bawah ini
- membuat database SIAK

```
1 CREATE DATABASE SIAK;
```

- Lalu membuat table user di database SIAK dengan query seperti yang ada di bawah ini

```
1 CREATE TABLE user (
2   id INT AUTO_INCREMENT PRIMARY KEY,
3   username VARCHAR(50) NOT NULL,
4   email VARCHAR(100) UNIQUE NOT NULL,
5   password VARCHAR(255) NOT NULL
6 );
7
```

- Selanjutnya membuat table mahasiswa dengan query di bawah ini

```
1 CREATE TABLE mahasiswa (
2   id INT AUTO_INCREMENT PRIMARY KEY,
3   id_user INT,
4   nama VARCHAR(100),
5   alamat TEXT,
6   fakultas VARCHAR(50),
7   tahun_masuk INT,
8   FOREIGN KEY (id_user) REFERENCES user(id)
9 );
10
```

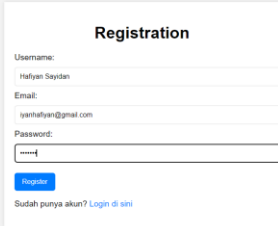

- Next kita membuat Super admin dengan query di bawah ini

```
1 INSERT INTO user (username, email, password) VALUES ('admin', 'admin@siak.com', MD5('passwordadmin'));
```

LANGKAH 3

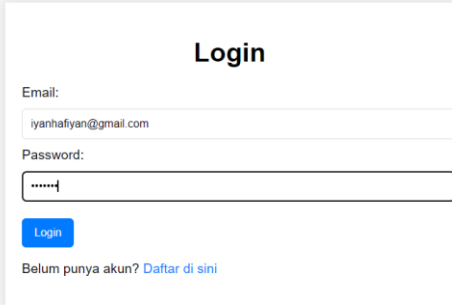

Mengimplementasikan kodingan dari file yang sudah di buat

- Register.php
Membuat username(Hafiyen Sayidan) ,Email (ianhafiyan@gmail.com) dan password (' iyan123`')

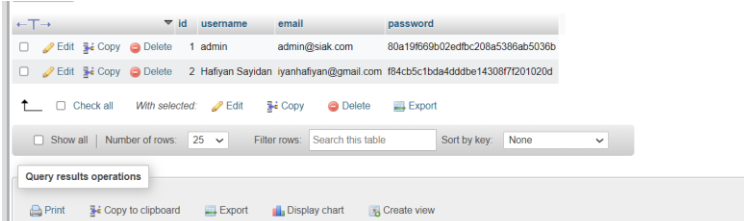

The image shows a web form titled "Registration". It contains three input fields: "Username:" with the value "Hafiyen Sayidan", "Email:" with the value "ianhafiyan@gmail.com", and "Password:" with a masked password "*****". Below the fields is a blue "Register" button. At the bottom, there is a link that says "Sudah punya akun? [Login di sini](#)".

- Setelah itu login.php atau klik “login disini”, setelah itu semua data nya akan auto masuk ke dalam database yang sudah kita buat di atas tadi di dalam table `user`

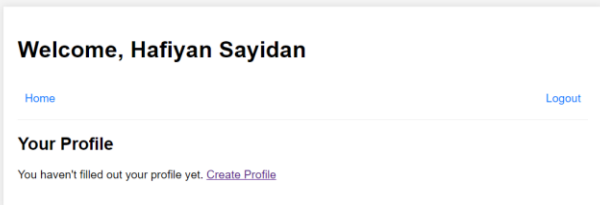

The image shows a web form titled "Login". It contains two input fields: "Email:" with the value "ianhafiyan@gmail.com" and "Password:" with a masked password "*****". Below the fields is a blue "Login" button. At the bottom, there is a link that says "Belum punya akun? [Daftar di sini](#)".

The image shows a screenshot of a database table named 'user'. The table has four columns: 'id', 'username', 'email', and 'password'. There are two rows of data. The first row has id '1', username 'admin', email 'admin@siak.com', and password '80a19f669b02edfbc208a538ab5036b'. The second row has id '2', username 'Hafiyen Sayidan', email 'ianhafiyan@gmail.com', and password 'f84cb5c1bda4dddb14308f7201020d'. Below the table, there are options to 'Check all', 'With selected', 'Edit', 'Copy', 'Delete', and 'Export'. There is also a 'Show all' button, a 'Number of rows' dropdown set to '25', a 'Filter rows' search box, and a 'Sort by key' dropdown set to 'None'. At the bottom, there are links for 'Query results operations', 'Print', 'Copy to clipboard', 'Export', 'Display chart', and 'Create view'.

	id	username	email	password
<input type="checkbox"/>	1	admin	admin@siak.com	80a19f669b02edfbc208a538ab5036b
<input type="checkbox"/>	2	Hafiyen Sayidan	ianhafiyan@gmail.com	f84cb5c1bda4dddb14308f7201020d

- Berikut tampilan awal dari dashboard.php

The image shows a dashboard page. At the top, it says "Welcome, Hafiyen Sayidan". Below this, there are two links: "Home" and "Logout". Underneath, there is a section titled "Your Profile" which says "You haven't filled out your profile yet. [Create Profile](#)".

- Setelah itu kita membuat profile dengan nama file create_profile.php

Create Your Profile

Nama:	<input type="text"/>
Alamat:	<input type="text"/>
Fakultas:	<input type="text"/>
Tahun Masuk:	<input type="text"/>
<input type="button" value="Create Profile"/>	

-
- Lalu kita isi saja sesuai apa yang kita mau

Create Your Profile

Nama:	<input type="text" value="Hafiyen Sayidan"/>
Alamat:	<input type="text" value="jalan penggilingan baru 1"/>
Fakultas:	<input type="text" value="Teknik"/>
Tahun Masuk:	<input type="text" value="2021"/>
<input type="button" value="Create Profile"/>	

-
- Hasilnya akan menjadi seperti ini

Welcome, Hafiyen Sayidan

[Home](#) [Logout](#)

Your Profile

Nama: Hafiyen Sayidan
 Alamat: jalan penggilingan baru 1
 Fakultas: Teknik
 Tahun Masuk: 2021

-
- Setelah itu datanya akan di simpan di table mahasiswa di dalam database phpmyadmin

-
- Untuk halaman logout.php akan memunculkan Kembali halaman login seperti gambar dibawah ini

Login

Email:

Password:

Belum punya akun? [Daftar di sini](#)

- Setelah itu kita mencoba akses halaman admin.dashboard.php dan kita login dengan email siak@gmail.com dan password nya adalah `passwordadmin` sesuai yang kita buat pada query di atas

Daftar di sini'."/>

-
- Lalu kita klik login dan hasilnya akan muncul seperti gambar di bawah ini , ini merupakan halaman admin_dashboard yang memiliki fitur, daftar user, tambah user, dan bisa mengedit, lalu ada logout

ID	Username	Email	Nama	Alamat	Fakultas	Tahun Masuk	Action
1	admin	admin@siak.com					Edit Delete
2	Hafiyah Sayidan	iyanhafiyah@gmail.com	Hafiyah Sayidan	jalan penggilingan baru 1	Teknik	2021	Edit Delete

-
- Di dashboard ini terdapat 2 data yang di mana data admin kita buat di query phpMyAdmin dan yang satunya kita buat di halaman membuat profile
- Jika kita klik tambah user di halaman admin.dashboard.php akan muncul gambar di bawah ini

- Kita isi hingga menjadi seperti ini lalu klik tambah

Tambah User

[Daftar User](#)[Tambah User](#)[Logout](#)

Username:

Sayidan Hafiyah

Email:

sayidanhafiyah@gmail.com

Password:

Tambah

-
- Lalu akan di tambahkan di dashboard dan akan menjadi seperti ini

Welcome, Admin

[Daftar User](#)[Tambah User](#)[Logout](#)

Daftar User

ID	Username	Email	Nama	Alamat	Fakultas	Tahun Masuk	Action
1	admin	admin@siak.com					Edit Delete
2	Hafiyah Sayidan	iyanhafiyah@gmail.com	Hafiyah Sayidan	jalan penggilingan baru 1	Teknik	2021	Edit Delete
3	Sayidan Hafiyah	sayidanhafiyah@gmail.com					Edit Delete

-
- Setelah itu kita akan mencoba fitur edit dan delete pada kolom nomer 3 dan akan menjadi seperti ini yang artinya sudah kita delete

Welcome, Admin

[Daftar User](#)[Tambah User](#)[Logout](#)

Daftar User

The image shows a code editor with a file explorer at the top displaying several files: database.php, register.php, login.php, logout.php, admin_dashboard.php, add_user.php, delete_user.php, and user_dashboard.php. The main editor area shows the content of register.php, which is a PHP script for a user registration form. The code includes a database connection, validation of the input, and an SQL insert statement. It also contains HTML for the form and CSS for styling.

```
<?php
include 'database.php';

if ($_SERVER["REQUEST_METHOD"] == "POST") {
    $username = $_POST['username'];
    $email = $_POST['email'];
    $password = md5($_POST['password']); // Ganti dengan enkripsi yang lebih aman

    $stmt = $pdo->prepare("INSERT INTO user (username, email, password) VALUES (?, ?, ?)");
    $stmt->execute([$username, $email, $password]);
}

?>
